

Un packing, Magic UV Rays Box

DIY Gadgets Private Limited

Received my
Magic box

Lets Unpack

That's it ,

No, let me look inside the carton, there must be something else also

- Some Tray and probably a power supply, lets look
- Lets take it out

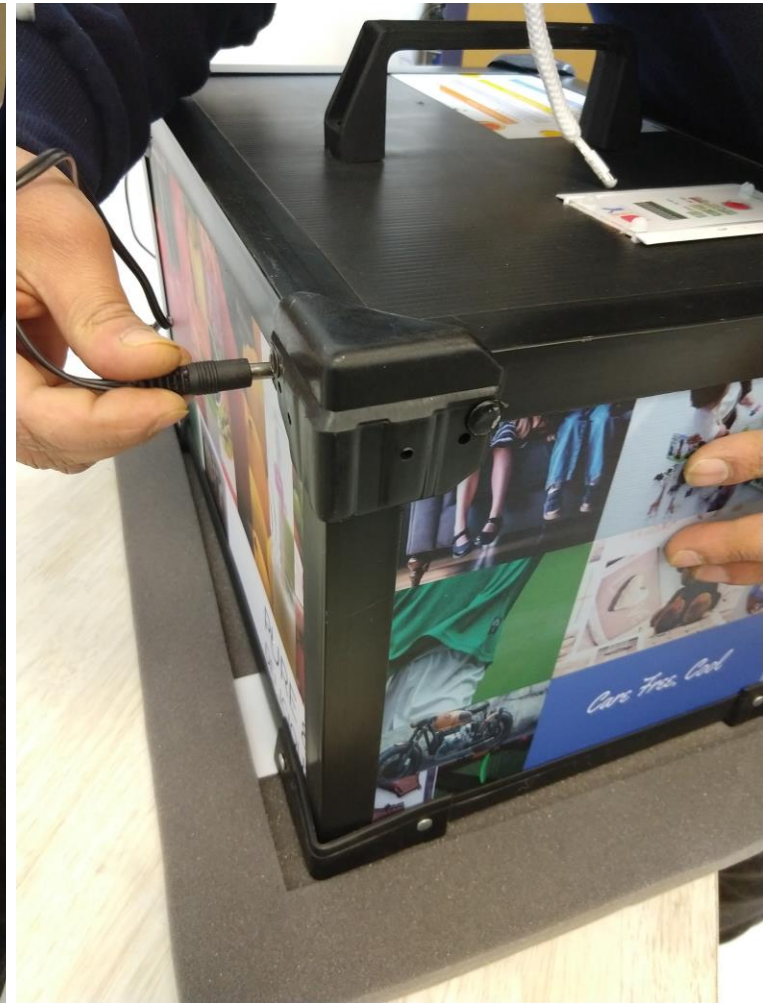

Wait there is a
foam inside the
Magic Box

It looks like a base, let me arrange

Oh, the
adapter, Lets
connect the
power

Lets put switch on

- All Leds come up.....
- And there is a no led, silence.
- Is the system working ??

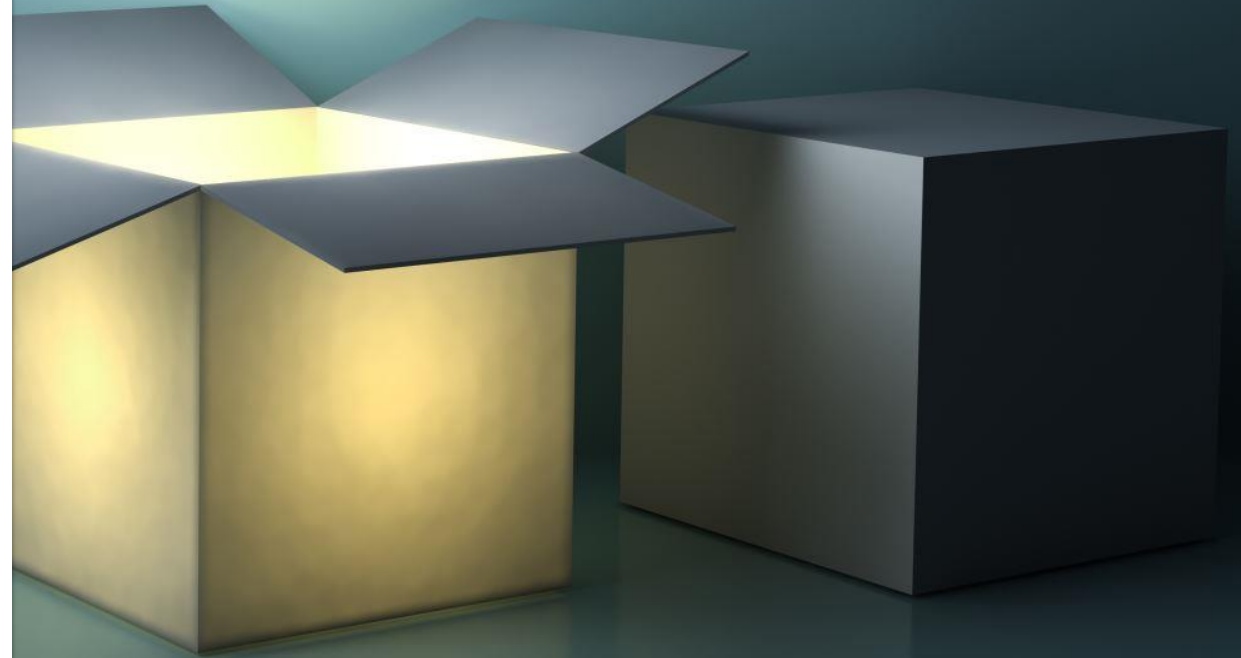

Lets lift the system and put back again

- Oh, the leds are now dancing
- They are actually waiting for you to operate the system
- Actually, when u lift the box, you signal it that will use it, and keep items for disinfection

Please note,
Even if the power is on, the system will wait
for a signal.

- The signal is provided by the user
by lifting the box
- Putting items on the tray
- Cover the items with the box

Ready to use, Operate panel as required

- One tap for most of needs of disinfection, couriers, grocery bags, newspapers etc
- Double tap for masks, mobile phones, wallets etc
- Hold, for special needs, like enhancing life of fruits, vegetables, or if you need a heavy dose to sterilize
